

Solcelle havelampe med LED flamme-effekt

LED garden lamp with built-in flame-effect, that reminds of a real torch. With a solar panel to recharge the built-in battery.

Enjoy the long and beautiful summer nights with this LED torch with built-in flame-effect and solar panel. The torch can be placed in all locations outside and gives a fantastic and realistic light in your garden. The flames moves just like a natural flame.

The torches built-in solar panel can charge the battery in 8 hours on a bright summer day or in 4 hours with the included USB-charger cable. After that the torch can light up in 8 hours. The torch also has a built-in on / off switch.

The touch consists of 3 parts; The torch itself, extension piece and bottom / spear. The parts are simply put together and you can choose if the torch should be 60cm or 80cm tall.

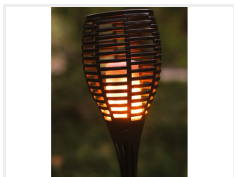

With this flame torch, you will have many cozy hours in the garden. The torch can, as mentioned, be placed outside, but we recommend to take it inside when frost sets in. If you let it be outside in winter, the LEDs might fade over time.
